

Corporate Finance (in lingua inglese) - A.Y. 2025/2026
Topic 3c: Financial planning

1. Briefly describe the content of financial planning and its usefulness.
2. What is (net) working capital? What is its correct value and why?
3. The quick ratio is 1: how do you interpret this value?
4. Illustrate the main reasons why a company should manage a reservoir of cash.
5. Is the reservoir of cash simply an amount of money? How do you determine it?
6. What is the difference between “cash” and “cash flow”? Can the two be negative?
7. Describe the causes of a change in equity.
8. Indicate which of the following changes represent use or source of cash and why: decrease in inventory, increase in marketable securities and decrease in bank loans.

If you need help, please revise Chapter 30 of the textbook.
