

Corporate Finance (in lingua inglese) - A. Y. 2025/2026
Topic 1: Introduction to Corporate Finance

1. Is Corporate Finance an academic or operational discipline?
2. What is an investment? Explain the difference between short- and long-term investments and tangible and intangible investments.
3. What is a financing? Discuss the difference between debt and equity.
4. What are pay out decisions? How does a manager decide the amount of cash to pay out?
5. Explain the difference between a limited and an unlimited liability company.
6. What is the role of a financial manager?
7. According to the shareholder value (or wealth) approach, what is the goal of a business and how can this be measured?
8. Can the goal of a firm, in the context of the shareholder value (or wealth) approach, satisfy all the stakeholders? Why?
9. Define the concept of (opportunity) cost of capital.
10. Explain how, through the concept of (opportunity) cost of capital, a financial manager can generate shareholder value.
11. What if there are (and there are!) shareholders with different expectations in terms of availability of cash today relative to tomorrow? Does the principle of shareholder value maximization still hold true?
